ADRIAN
DANLOS

Frontend developer

PROFILE

As an enthusiast for progress my goal is to create innovative websites and applications that could make a positive impact in society and solve real world problems.

I am fascinated by technology and innovation and would love to make my little contribution to create a more thrilling future together with a passionated team.

Young, fresh, and fast-paced organizations feels like home to me.

EDUCATION

Web Development Degree
Egibide University

WORK EXPERIENCE

November 2020 - Present

Frontend Developer // Benocs - Deutsche Telekom

- Architecting and implementing the frontend of the the first ever ISP/CDN cooperative application to provide ISPs and CDNs with next-generation network telemetry and analytics.
- Performing on a variety of different languages, platforms and frameworks such as React, MobX, TypeScript, Django, Cypress, Sass, Docker, Internal and 3rd party APIs...
- Working under a startup mindset, utilizing modern technologies and methodologies (scrum) to ensure efficiency and high quality code.
- Currently developing our software for some the most well known ISP/Internet brands worldwide.

June 2019 - June 2020

Web developer // Ibai Scanbit

- Contribution to over 10 Web Apps that serve as digital repositories for public institutions.
- Test and implementation of performant and responsive code to ensure cross-browser compatibility and responsiveness in all devices.
- Clients I worked for at Ibai Scanbit: Banco de España, CEU, Comunidad de Madrid, Universidad de Navarra...

PROJECTS

Benocs Analytics

A high performance tool intended for ISPs/CDNs that collects data from multiple network protocols at several layers and computes the data to display the results as an easy to read, multi-dimensional and accurate picture of their network's topology and traffic volume.

Vue World

A lodging SPA that offers accomodation for your trips all around the world.
It follows the philosophy of popular booking websites such as Airbnb and Hostelworld.
Built with VueJS VueX and Laravel

UJI Dspace

A digital repository built for Jaume I university that serves as a digital archives system, focused on the long-term storage, access and preservation of scholarly and published digital content. Built with Dspace open source package.

Apex Legends Tracker

A real-time statistic tracker for Apex Legends videogame. Search for your username to display data about your rank, kills, wins, top3's.. Ideal for all players that would like to keep track of their in-game stats.

CloudRoad

An enterprise web app designed to provide quicker assistance to road incidents by providing real-time data trough webcams, graphs, map visualization and route algorithms that allow technicians to solve incidents in a rapid and easy way.

SKILLS
