WORK EXPERIENCE

November 2020 - Present • Berlin, Germany
Fullstack developer // Benocs - Deutsche Telekom

- Creating complex web data visualizations to provide ISPs and CDNs with next-generation network telemetry and analytics, transforming raw network data into understandable and visually pleasing representations.
- Utilizing an agile workflow to ensure optimal efficiency, regular testing and maintain high standards of code quality.
- Developing software for some of the most well known ISP/Internet brands worldwide.

June 2019 - June 2020 • Vitoria, Spain
Fullstack developer // Ibai Scanbit

- Contributed to over 10 Web Apps that serve as digital repositories for public institutions and big companies.
- Test and implementation of performant and responsive code to ensure cross-browser compatibility and responsiveness in all devices.
- Clients I worked for at Ibai Scanbit: Bank of Spain, CEU, Community of Madrid, University of Navarra...

PROJECTS

Benocs Analytics ⤢

High-performance tool specifically designed for Internet Service Providers (ISPs) and Content Delivery Networks (CDNs) that serves as a solution for collecting, processing and displaying data from multiple network protocols, providing a clear and easily understandable representation of their network's topology and traffic volume.

AERTiCKET Billing App ⤢

Freelance web application that serves as a billing tool for managing customers, smoothly handling tasks such as storing, retrieving, filtering, editing, deleting, and exporting data. The project's main goal is to enhance the company's billing processes and improve the management of customer data.

Vue World ⤢

A lodging SPA that offers accomodation for your trips all around the world. It follows the philosophy of popular booking websites such as Airbnb and Hostelworld. Built with VueJS VueX and Laravel.

UJI Dspace ⤢

A digital repository built for Jaume I university that serves as a digital archives system, focused on the long-term storage, access and preservation of scholarly and published digital content. Built with Dspace open source package.

CloudRoad ⤢

An enterprise web app designed to provide quicker assistance to road incidents by providing real-time data trough webcams, graphs, map visualization and route algorithms that allow technicians to solve incidents in a rapid and easy way.
